PROFESSIONAL SUMMARY

Recent Information Technology graduate with hands-on experience in web development through academic projects and internships. Proficient in developing web and mobile applications and building RESTful APIs, with strong analytical, problem-solving, and teamwork skills.

WORK EXPERIENCE

Alpha Centauri Garments Corporation	Feb 2026 - May 2026
<i>Junior Web Developer Intern</i>	<i>Mother Ignacia, Quezon City</i>
- Developed and implemented features for a property management platform, enhancing user experience for both property owners and staff. - Built and optimized mobile application features including Reservations, Booking Management, and Revenue Management, improving app usability and performance. - Contributed to front-end web portal development, successfully integrating modules for Staff Management, User Management, and Analytics & Reports to streamline operations. - Collaborated with a multidisciplinary team to align project goals, resulting in improved project delivery timelines and increased application functionality. - Supported troubleshooting efforts and system testing to ensure high-quality deliverables and client satisfaction.	

PROJECTS

Employee Attendance Monitoring App with Data Analytics for Work Progress
<i>Developer</i>
- Developed a mobile and web-based employee attendance monitoring system, improving attendance tracking efficiency. - Implemented GPS geofencing and biometric (Fingerprint) authentication for enhanced attendance security. - Built RESTful APIs using Node.js and PostgreSQL, facilitating seamless data management and system integration. - Designed the employee mobile application using Flutter, offering user-friendly interfaces for attendance input. - Created a data analytics dashboard to visualize attendance trends and employee performance metrics, aiding workforce management.
